Mode of Evaluation-

Internal evaluation will be based on Assignment + Presentation

COURSE INTRODUCTION

The Course is designed for the students to pursue graduation and post-graduation with Economics in regular mode in semester system. The programme aims to inculcate economic thinking in students and help them in economic decision making. It aims to develop analytical view point in the students about the economic behavior of the people. The objective is to nurture the students as socially responsible and ethically aware citizens.

	Programme Outcomes (Pos):				
PO 1	Economics subject enables the learners to build up a professional career as				
	economists, financial advisors, economic planners and policy makers. It prepares				
	them to cope up with the stress and strain involved in the process of economic				
	development.				

	Programme Specific Outcomes (PSOs): UG IV Year				
	Bachelor of Economics with Research				
PSO1	To understand the Advanced concepts of Microeconomics.				
PSO2	To understand the Advanced concepts of Macroeconomics.				
PSO3	To understand the Advanced concepts of Public Finance.				
PSO4	To understand the concepts of Research Methodology.				
PSO5	To understand the concepts of Mathematical Economics.				
PSO6	To understand the Advanced concepts of Labour Economics.				
PSO7	To understand the Advanced concepts of Agricultural Economics.				
PSO8	To understand the Advanced concepts of Indian Economy.				
PSO9	To understand the concepts of Cultural Economics.				
PSO10	To understand the Advanced concept of Statistics.				

	Programme Specific Outcomes (PSOs):
	PG V Year
	Master's in Economics
PSO1	To understand the Advanced concepts of Microeconomics.
PSO2	To understand the Advanced concepts of Macroeconomics.
PSO3	To understand the Advanced concept of Economics Growth & Development.
PSO4	To understand the concepts of Advanced International Economics.
PSO5	To understand the concept of Econometrics.
PSO6	To understand the concept of History of Economic Thought.
PSO7	To understand the concepts of Financial Institutions and Markets.

PSO8	To understand the concepts and theories of Demography.
PSO9	To understand the concepts of Industrial Economics.

Bachelor of Economics with Research						
Programme: Bachelor of Econ	omics with Research	Year 4	Semester 7			
			Paper I			
	Subject : Economics					
Course Code: ECODSC701 Course Title : Advanced Microeconomics-I						
Course Outcomes: The course v	vill help students to:					

Course Outcomes: The course will help students to:

- Students will be able to analyze consumer choices using utility theory and indifference curve analysis, and evaluate demand elasticity and consumer surplus.
- Students will understand production functions, optimal factor combinations, and the impact of technological advancements on production efficiency.
- Students will be able to derive cost curves from production functions and analyze cost behavior, economies of scale, and their implications for business decisions.
- Students will evaluate market dynamics under perfect competition, including demand and supply interactions, market equilibrium, and the effects of taxes and price controls

Credit	Credits :4 Credits Discipline Specific	
Unit	Topics	No. of
		Hours
I	Introduction to Consumer Behavior: Choice & Preference of	16
	Consumer, Axioms of Rational Choice. Utility Theory: Ordinal Utility	
	analysis, Indifference curves, Budget Constraints and their properties,	
	Marginal Rate of Substitutions, Utility Maximization and Consumer	
	Equilibrium. Demand Analysis: Theory of Demand, Elasticity of	
	Demand, Concepts, Measurements. Comparative Statics- Engel Curve.	
	Price, Substitution and Income Effects, Hicks and Slutsky	
	Decomposition; For normal goods, Inferior goods and Giffen Goods;	

	Marshallian and Hicksian Demand Functions. Consumer Surplus: Definition, Importance, and Calculation, Applications in Economic Analysis. Revealed Preference Hypothesis, Hicksian Revisions. Consumer Choice under Uncertainty: Simple Lottery, Compound Lottery, Definitions of Risks Aversion, Risk Lover & Risk neutral, Von Neumann-Morgenstern's Expected Utility Theory, Certainty Equivalent, Concavity of utility function and Measures of Risk Aversion.	
II	Production Theory: Overview of Production Functions, Short-Run vs. Long-Run Production Functions. Theories of Production: Law of Variable Proportions, Returns to Scale: Increasing, Constant, and Decreasing Returns. Isoquants: Definition and Interpretation, Marginal rate of technical substitution, Elasticity of Substitution. Optimal Factor Combination: Equilibrium of the Firm, Choosing the Optimal Combination of Production Factors. Production Function: Cobb Douglas, Constant Elasticity of Substitution (CES), Variable Elasticity of Substitution (VES), The Role of Technological Advancements on Production Efficiency. Producer's Equilibrium and Input supply functions.	16
III	Cost and Revenue Functions: Short run and long run cost, Marginal and Average Cost Concepts. Traditional and Modern Theories of Costs: Examination of Traditional Cost Theories, Overview of Modern Approaches to Cost Analysis. Definition of Iso-cost curve, Scale Lines and Ridge Lines. Derivation of Cost Curves from Production Functions: Understanding the Relationship Between Production Functions and Cost Curves. Economies of Scale: Definition and Types, Impact on Long-Run Average Cost Curves. Cost Structures: Fixed Costs vs. Variable Costs, Economies and Diseconomies of Scale. Analysis of Cost Behavior over different Time Horizons. Revenue Concepts: Understanding the relations between Revenue Curves (Average Revenue (AR), Marginal Revenue (MR), and Total Revenue (TR)).	16
IV	Competitive Markets -Perfect Competition: Introduction to Market Structures and Perfect Competition – Definition, Market Equilibrium and Equilibrium of a firm under Perfect Competition (Short Run & Long Run), Shut Down Point, Break-Even Point, AVC and Supply Curve. Tax Incidence Analysis: Understanding how taxes affect market prices and consumer behaviour, Analysis of the distribution of tax burdens between consumers and producers. Price Controls and Their Effects: Overview of government-imposed price controls, including price ceilings and floors, Discussion of the consequences of these controls on market efficiency and resource allocation.	12

Cours	Course Outcomes: The course will help students to:				
•	Analyze and apply key economic functions and their	implications.			
•	Perform matrix operations and solve linear equations	using determinants.			
•	Apply differentiation and integration to optimize econ	nomic models.			
•	Utilize input-output analysis, linear programming,	and game theory	in economic		
	decision-making.	•			
Credit	s : 4 Credits	Discipline Specific	Elective		
Unit	Topics		No. of		
			Hours		
	Functions in Economic Analysis		15		
	Types of Functions: Overview of Different Types of Functions,				
	Introduction to Economic Functions: Revenue, Cost, Demand, and				
	Supply Functions. Convex and Concave Functions: Characteristics of				
	Convex and Concave Functions, Implications for Economic Models.				
	Multivariable Functions: Introduction to Multivariable Functions.				
	Types of Production Functions: Homogeneous and Homothetic				
	Functions				
II	Linear Algebra, Matrix and Determinants		15		
	Introduction to Linear Algebra: Key Concepts an Linear Algebra. Matrix Operations: Addition, Subt	•			

Multiplication & Multiplication of Matrix. **Properties in Matrix Operations:** Commutative, Associative, and Distributive laws. Types of

	Matrices. Determinants and Their Properties: Introduction to	
	Determinants and Non-Singularity, Calculation of Third-Order	
	Determinants, Minors, and Cofactors, Laplace Expansion and Properties	
	of Higher-Order Determinants.	
	Matrix Inversion and Applications: Understanding Co-factor and	
	Adjoint Matrices, Calculating Inverse Matrices and Their Role in	
	Solving Linear Equations, Application of Cramer's Rule and Gaussian	
	Method for Matrix Inversion.	
III	Differentiation: Rules of Differentiation, Derivative vs. Differential.	15
	First and Second Order Derivatives. Applications of Second Order	
	Derivatives: Optimization Problems: Identifying Maximum and	
	Minimum Values. Application of Differential calculus in Economics.	
	Integration: Elementary Integration. Difference Equations of First and	
	Second Order. Simple Applications of Integral Calculus in Economics.	
	Second Order. Simple Applications of integral calculus in Economics.	
IV	Input-Output Analysis, Linear Programming & Game Theory	15
	Input-Output Analysis: Understanding Open and Closed Economic	
	Systems, Analyzing Interdependencies Between Different Sectors.	
	Linear Programming: Introduction to Primal and Dual Problems in	
	Linear Programming. Solving Linear Programming Problems Using	
	Graphical and Simplex Methods. Game Theory Fundamentals: Key	
	Terminology and Concepts in Game Theory, Exploring Strategic Form	
	Games and Identifying Dominant Strategies.

Programme :Bachelor of Econ	omics with Research	Year 4	Semester 7 Paper III(b)	
	Subject : Economics	•		
Course Code: ECOGE702 Course Title: Agriculture Economics-I			nomics-I	
Course Outcomes:				

- The students will learn about meaning of agriculture economics, types of agriculture and agriculture finance.
- The students will learn about technology in agriculture and land utilization.

Credits	s: 4 Credits	
Unit	Topics	No. of Hours
Ι	Agriculture Economics: Meaning, Characteristics, Nature, Scope and Importance. Role of Agriculture in Economic Development. Interrelationship between Agriculture and Industry. Agro-based Industries. Diversification of Agriculture.	13
II	Agriculture and Allied Activities: Livestock Resources, Fishery and Poultry Development, Forestry, Horticulture and Floriculture, Green Revolution, White Revolution and Blue Revolution.	13
III	Land Reforms: Meaning and Objectives. Land Tenure and Farming Systems: Peasant, Capitalist, Collective and State Farming. Tenancy and Crop Sharing– Forms, Incidence and Effects. Farms: Meaning, Types and Factors determining size of farms.	20

IV	Technology in Agriculture: Traditional Techniques and Practices.	14
	Technological Change and Agriculture. Types of Farming: Dry Land	
	Farming, Sustainable Farming, Vertical Farming, Organic Farming and	
	Mixed Cropping. Agriculture Productivity and Returns to Scale.

Economics-II					Bachelor	
					of	
					Economics	

Bachelor of Economics with Research							
Programme: Bachelor of Economics with Research	Year 4	Semester 8 Paper III(d)					
Subject : Economics							
Course Code: ECOGE804 Course Title: Cultural Economics-II							

Course Outcomes: The course will help students to:

- Interpret the practical applications of cultural economics in sectors such as tourism, media, and public policy.
- Assess the socio-economic value of cultural heritage and identity, especially in contemporary and regional contexts.
- Explore and analyse Uttarakhand's cultural economy using conceptual and real-life examples, encouraging localized understanding of national frameworks.

Credits	s: 4 Credits Generic Elec	etive
Unit	Topics	No. of
	_	Hours
Ι	Cultural Economics in Public Policy and Governance: Cultural	ural 15
	Capital and Human Development Indicators. Art, Culture,	and
	Identity in Social Inclusion. Cultural Consumption in the Dig	ital
	Age: Role of Media, Film, and Literature in Cultural Economy.	
	Economics of Festivals, Rituals, and Events	
II	Cultural Tourism: Concepts, Stakeholders, and Value Cha	ain. 15
	Linkage between Tourism and Local Economies. Sustaina	ıble
	Development and Culture: Models of Sustainable Culture	ural
	Tourism. Ecotourism. Economics of Heritage: Economic Impac	et of

	Heritage Sites and Monuments. Indigenous Knowledge and Craft	
	Economies. Case Studies: UNESCO Heritage Sites and Indian	
	Experiences.	
III	Contemporary Issues in Cultural Economics: Globalization vs.	15
	Localization of Culture. Cultural Commodification and Intellectual	
	Property Rights. Economics of Digital Content Creation (OTT &	
	Music). Impact of Technology on Cultural Work and Labor. Gender,	
	Class and Caste in Cultural Production and Access. Public-Private	
	Partnerships in Culture: Opportunities and Challenges.	
IV	Cultural Traditions of Uttarakhand: Overview, Folk Art, Dance,	15
	Music, and Oral Literature Traditions. Economics of Culture in	
	Uttarakhand: Local Craft Industries (Woodwork, Wool and	
	Handicrafts). Religious Tourism and its Economic Significance	
	(Char Dham Yatra and Temples). Government and Culture:	
	Policy Frameworks and Schemes related to Culture in Uttarakhand.	
	Role of Non-Government Sector: NGOs, SHGs, and Community-	
	based Models in Cultural Promotion.

Master's in Economics						
Programme: Master's in Econo	omics	Year 5	Semester 9 Paper I			
Subject : Economics						
Course Code: ECODSC901						

Course Outcomes: The course will help students to:

- Students will be able to analyse the characteristics of imperfect competition, evaluate monopoly power and its effects, and apply game theory to understand strategic interactions in oligopoly.
- Students will understand the implications of adverse selection, analyse information asymmetries, and explore mechanisms like signalling and screening to improve market outcomes.
- Students will differentiate between price concepts, apply general equilibrium models, and assess efficiency and optimality in resource allocation using tools like the Edgeworth Box and Walras' Law.
- Students will evaluate the fundamental theorems of welfare economics, analyse public goods and externalities, and discuss social choice theory and contemporary debates on welfare and equity.

Credit	Credits :4 Credits Discipline Specific		
Unit	Topics	No. of Hours	
ı	Introduction to Imperfect Market Structure: Definition and	15	
	characteristics of imperfect competition, Comparison with perfect		

competition and monopoly. Monopoly: Reasons for Monopoly, Monopoly Power & Lerner's Index, Impact of Monopolies on Consumer
Welfare and Market Efficiency. Monopoly Equilibrium: Determining
equilibrium in a monopoly market, Analysis of pricing and output
decisions. Multi-plants Monopoly. Price Discrimination: Overview of
price discrimination and its types, Effects of price discrimination on
consumer surplus and firm profits. Monopolistic Competition-
Equilibrium Condition and Firm Behaviour. Oligopoly: Characteristics
of oligopolistic markets, Strategic interactions among firms in an
oligopoly. Economic Models of Oligopoly: Cournot Model, Bertrand
Model, Chamberlin Model, Kink Demand Curve Model & Stackelberg
Model. Game theory: Nash equilibrium, Prisoner's dilemma, saddle
point solution, cooperative versus non-cooperative games, simultaneous
games and sequential games. Tax Incidence: Understanding tax
incidence and its implications in imperfect markets, analysis of how
taxes affect prices and consumer behaviour. Market Failures:
Understanding the concept of market failure, types, causes and
consequences of inefficiencies in markets.
II Information and Market Efficiency: Analysis of how information 15
asymmetries impact the efficiency of market outcomes, Role of
information in facilitating or hindering effective market transactions.
Understanding Adverse Selection: Definition, significance, concept
through "Market for Lemons" model. Signalling Mechanisms:
Exploration of signalling and examples in various markets. Screening
Techniques: Examination of how screening can mitigate adverse
selection and improve market outcomes. Moral Hazard: Definition and
implications of moral hazard in insurance and financial markets.
Principal-Agent Problem: Analysis, challenges Exploration of
strategies to align incentives and reduce agency costs.
General Equilibrium Analysis - Price Concepts: Differentiating 15
between absolute prices and relative prices. Perfect Competition Prices
and General Equilibrium Models – with and without production. Pure
Exchange Economy: Edgeworth Box. Efficiency and Optimality:
Understanding Pareto improvements, Defining Pareto efficiency in
allocation of goods and resources, Exploration of the contract curve and
its role in identifying efficient allocations. Walras' Law: Introduction
to Walras' Law and its implications for equilibrium of market,
Conditions necessary for achieving Walrasian equilibrium, Walrasian
Equilibrium Analysis.
Welfare Economics: Introduction to the first and second fundamental 15
theorems of welfare economics, graphical representation and
interpretation. Interpersonal Comparisons and Ethical
Considerations: Challenges associated with interpersonal comparisons

of utility, Examination of the aggression problem and its implications for welfare assessments. Public Goods and Externalities: Understanding the characteristics of public goods and the issues surrounding their provision. Analysis of externalities and their impact on social welfare, including positive and negative externalities, Pigovian & Coasian Solution. Social vs. Private Welfare: Exploration of the divergence between social welfare and private welfare, Discussion of the implications for economic policy and resource allocation. **Compensation Principle:** Introduction to the compensation principle and its role in welfare economics, Evaluation of how this principle can guide policy decisions to improve social welfare. Pareto Optimality: Definition and significance of Pareto optimality in resource allocation, Analysis of conditions under which Pareto efficiency is achieved. Social Choice Theory: Overview of social choice theory and its relevance to welfare economics, Recent schools of thought (Amartya Sen and Ronald Coase).

Programme : Master's in Econ	omics	Year 5	Semester 9 Paper II (c)			
	Subject : Economics					
Course Code : ECODSE903 Course Title : Econometrics-I						
Course Code : ECODSE903	Course Title : Economet	trics-I				

Course Outcomes: The course will help students to:

- Understand the foundational concepts and measurement techniques in econometrics.
- Apply Ordinary Least Squares (OLS) and Classical Least Squares (CLS) methods for estimating single equation models.
- Understand the problems and limitations of OLS Estimation
- Utilize advanced least squares methods, including Generalized Least Squares (GLS) and Restricted Least Squares (RLS), for econometric analysis.

Credits	: 4 Credits	Discipline Specific	c Elective					
Unit	Topics	No. of						
ı	Introduction to Econometrics		15					
	Role of Measurement in Economics. Stochastic Ap	pproach. Normal						
	Probability Distribution. Sources and Types of Data. Exogenous,							
	Endogenous, and Predetermined Variables. Parameters. Econometric							
	Model. Recursive Model							
ll ll	Estimation of Single Equation Model (Least Squar	es Methods)	15					
	Method of Ordinary Least Squares (OLS) and Classic	cal Least Squares						
	(CLS): Gauss-Markov Theorem, Assumptions, Estimates of							
	Parameters, Characteristics, Standard Error, Estimate	s of Disturbance,						
	Variance, Coefficient of Determination (R-Squared	and Adjusted R-						

	Squared), Coefficient of Partial and Multiple Correlation Prediction, Inferences and Interpretation of Regression Coefficients, 't' and 'F' Statistic	
III	Problems in OLS Estimation: Heteroscedasticity, Auto-Correlation (First-Order), Multicollinearity. Consequences, Tests and Remedies	15
IV	Advanced Least Squares Methods Dummy Variables. Qualitative Variables, Method of Generalized Least Squares (GLS) – Assumptions, Estimations and Interpretation, Method of Restricted Least Squares (RLS) - Assumptions, Estimations and Interpretation, Pooling of Cross Section and Time Series Data	15

1. D. Gujrati: Basic Econometrics

2. A. Koutsoyiannis: Theory of Econometrics

Recommended /Additional Reading:

Master's in Economics						
Progra	mme : Master's in Economics Year 4 Semes Paper					
	Subject : Economics					
Course	Code: ECOGE904 Course Title: Industrial Economics-I					
Course	Outcomes: The course will help in:					
•	Learning about industrial economics and industrialization.					
•	Learning about organizational form, market and demand.					
Credits	<u>e</u>					
Unit	Topics	No. of Hours				
I	Industrial Economics and Industrialization: Meaning and scope of Industrial Economics. Concept and factors affecting Industrialization. Factors affecting Industrial Development Industry and Sectoral Linkages. Industrialization and Regiona Development. Industrial Efficiency: Meaning, Determinants Measurement, Efficiency and Decision-making process, Efficiency and size of the Firm.	;				
II	Organizational Form: Meaning. Organizational Form and Alternative Motives of the firm (Profit Maximization, Sales					

	Maximization, Growth Maximization, Staff Maximization models), Choice of organizational form, Economies and dis-economies of Scale. Optimum Size of the Firm.	
III	Market: Meaning of Market Structure and Market Conduct. Market Concentration: Meaning, form of market concentration and its effect on market performance. Market concentration and Market power. Concept of workable Competition. Market Structure and Innovation, the Process of Innovation, The Theory of Technological Innovation.	18
IV	Demand: Meaning and Determinants of Demand, Law of Demand, Elasticity of Demand: Meaning and its measurement. Demand analysis and demand forecasting, Demand under different forms of market.	10
